PROFESSIONAL SUMMARY

Full Stack Developer specializing in **MERN, TypeScript, and Tailwind CSS**. I build scalable web apps end-to-end, from backend architecture to pixel-perfect, luxury UI/UX. Currently diving deep into **AI integration** to build smarter, more powerful products.

EDUCATION

Guru Tegh Bahadur Institute of Technology

Bachelor of Technology in Electronics and Communication

2022 – 2026

Delhi, India

JM International School

XII (CBSE)

2021

88%

PROJECTS

PrepSync 📄 | 🐙 | Next.js, TypeScript, Cloudflare Workers, D1, Better Auth

- Built an **AI interview prep generator** that turns a job description + company URL into a structured, editable kit of questions, flashcards, and a study schedule.
- Designed a **multi-stage pipeline** with a **3-provider LLM fallback** (NVIDIA → Groq → Gemini) and a coverage check ensuring every requirement maps to a question.
- Implemented **Better Auth** (PBKDF2 password proofs, Google OAuth) on a **serverless Cloudflare Workers + D1 backend**, deployed free-tier end-to-end.

FoundrScore 📄 | 🐙 | React.js, TypeScript, Node.js/Express, MongoDB, Groq, Gemini API, Zod

- Built an **AI startup-idea validator** that scores ideas on **5 metrics** and gives a **verdict, competitor analysis** and **budget runway**.
- Engineered a **multi-LLM router** with **automatic fallback** (Groq → Gemini → Llama 3.1) for high availability.
- Validated LLM output with **Zod** and secured the API with IP-hashed rate limiting and MongoDB storage.
- Designed an animated UI with **Framer Motion** and a **shareable PNG verdict card**.

Archive 📄 | 🐙 | MERN Stack, TypeScript, Cloudinary, Clerk, FFmpeg

- Architected a full-stack media management platform using **MongoDB, Express, React, and Node.js (MERN)**, with TypeScript across the entire pipeline.
- Engineered an asynchronous server-side video assembly pipeline utilizing **FFmpeg**, handling end-to-end media uploads via **Cloudinary**.
- Integrated secure user authentication using **Clerk** and established a seamless media upload pipeline via **Cloudinary** integration.
- Designed a premium, warm archive-themed user interface using **Tailwind CSS**, optimizing data fetching and layout responsiveness for media-heavy components.

TECHNICAL SKILLS

Languages: C/C++, JavaScript, TypeScript, Python

Frontend: React.js, Redux, Tailwind CSS, HTML/CSS

Backend & Databases: Node.js/Express.js, MongoDB

AI/LLM: LangChain, RAG

Tools & Services: GitHub

ACHIEVEMENTS

- Smart India Hackathon (SIH) Participant.
- Build with India Hackathon Participant.
- Deloitte Technology Job Simulation (Forage) - Completed practical tasks in Coding and Development.
- PCB Design Workshop at CDAC Noida.
- Machine Learning Certification from NIELIT.
